Experience

Kroger Technology Blue Ash, OH
Software Engineer May 2026 – Present

- Designed and built an AI-driven development workflow using GitHub Actions, Claude, and Jira, enabling AI models to plan implementations, write code, and create pull requests from Jira tickets, with human approval of plans before execution.
- Defined implementation requirements and developed multiple new Go geospatial API endpoints across data and domain layers, converting coordinates into GeoJSON features and calculating geographic area.
- Implemented a geospatial feature table with Liquibase and developed migration scripts to move legacy data into the new schema, executing migration jobs through Rancher.
- Migrated multiple legacy services from RKE to RKE2, building Harness deployment pipelines, automating secret deployment, and decommissioning RKE deployments.
- Supported and maintained production and non-production geospatial, address, and location services.

Cincinnati Insurance Companies Fairfield, OH
Software Engineer Intern May – August 2024, January – May 2025, September 2025 – April 2026

- Improved backend data retrieval through optimized SQL queries and enhanced frontend data visualization UI within the internal monitoring and incident alert platform, increasing accuracy, system performance, and clarity of displayed metrics.
- Engineered ETL pipelines to ingest and standardize incident alert data from Nagios, Dynatrace, and Splunk into a unified schema, integrating REST APIs to populate the new internal monitoring platform.
- Built automation scripts in Python, PowerShell, and C# to migrate systems off BMC TrueSight after a 700% price increase.

Kroger Technology Blue Ash, OH
Software Developer Intern May – August 2025

- Increased unit test coverage from 60% to 90% across six repositories, improving release reliability and code maintainability.
- Implemented CI/CD pipelines in GitHub Actions with automated coverage gates to enforce minimum 90% test coverage.

Ohio State University Columbus, OH
Teaching Assistant, Discrete Structures August – December 2024, August – December 2025

- Led weekly office hours for 30+ students, clarifying algorithm analysis, recursion, and proof techniques.

Siemens Digital Industries Software Milford, OH
Software Developer Intern June – August 2022, June – August 2023

- Developed an app for tracking intern progress and reviews, used by 70+ interns each rotation.
- Optimized performance, implemented features, and fixed bugs for Siemens intern social media app (100+ users).

Projects

AI Game Recommender — JavaScript, React (Vite), Node.js/Express, MongoDB, AWS *Live Site:* game.kyle-white.com

- Built web app to generate personalized game recommendations using OpenAI, hosted on EC2 with Nginx reverse proxy.
- Integrated the Steam API to retrieve game library and hours played from users' Steam accounts to power recommendations.

Pickleball Analytics Web App — TypeScript, React (Vite), Tailwind CSS, AWS *Live Site:* pickle.kyle-white.com

- Engineered a full-stack web app for tracking league matches and generating analytics (streaks, point differential, standings).
- Implemented secure Cognito authentication and serverless backend (API Gateway, Lambda, and DynamoDB).

Skills

Languages: Java, Go, Python, JavaScript, TypeScript, C#, C/C++, SQL
Frameworks: React, Node.js/Express, Tailwind CSS, Vite, MonoGame
Tools & Infrastructure: Git, GitHub Actions, Docker, Kubernetes (RKE/RKE2), Harness, Rancher, JFrog Artifactory, Linux
Cloud: Azure, AWS (Lambda, API Gateway, S3, CloudFront, Route 53, EC2, Cognito, Amplify)
Databases: PostgreSQL, MySQL, SQL Server, DynamoDB, MongoDB, Liquibase
Testing: JUnit, Go testing, Testify

Education

The Ohio State University May 2026
B.S. Computer Science and Engineering | GPA: 3.8
